

BLACK PEARLS® 1300 Specialty Carbon Black

Product Highlights

BLACK PEARLS 1300 specialty carbon black is a versatile and easily dispersible carbon black for coatings applications. The pigment imparts a relatively strong blue undertone and level of gloss compared to other Cabot carbon blacks. It delivers consistent performance and can be mixed using varying performance tiers of equipment technology.

Key Applications

BLACK PEARLS 1300 specialty carbon black is suitable for use in liquid and powder coatings requiring standard masstone and jetness, such as those used in automotive applications.

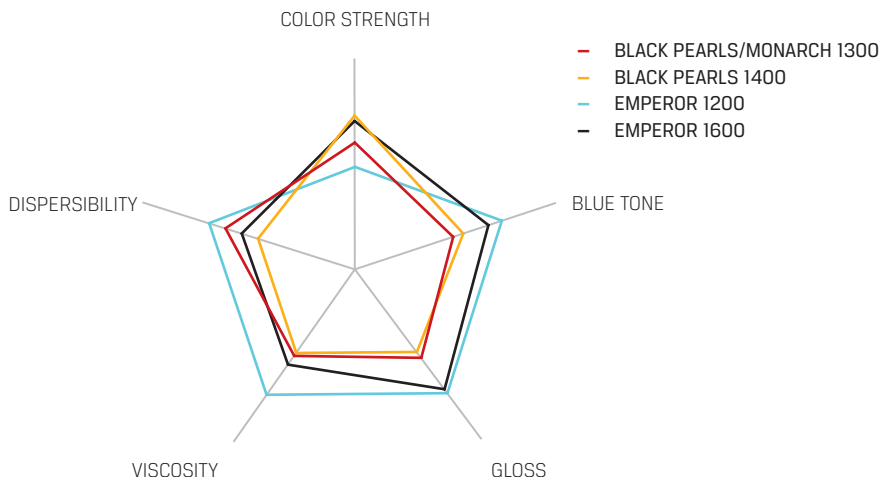

BLACK PEARLS 1300 specialty carbon black is relatively easy to disperse compared to other Cabot carbon blacks. The product should be considered when ease of dispersion is a key factor in product selection, such as when older dispersion equipment technology is in use.

A non-pelletized carbon black having similar morphology is available in an even more easily dispersible fluffy form as MONARCH® 1300 specialty carbon black.

Performance Features

- ◆ Easy to disperse
- ◆ Delivers strong blue undertone
- ◆ Imparts strong gloss levels

Performance Comparison to Other High Color Carbon Blacks

BLACK PEARLS[®] 1300 Specialty Carbon Black

Packaging

- ◆ Product Form: Pellets
- ◆ Regional Availability: Global
- ◆ Bag Packaging Options: 50 lb paper
- ◆ Bulk Packaging Options: Not available
- ◆ Bulk Density: 25 lb/ft³ (400 g/L)

Storage Requirements: The Material Safety Data Sheet (MSDS) contains the storage recommendations for this product. The MSDS may be obtained from your Cabot representative or on our website, www.cabotcorp.com.
